---

Hi Darrell and team,

Stephen helped put together the following images for IOS.

Could we try these? Let us know if they work.

Thanks,  
Alyssa

Hi Darrell,

We use PNG files in the app.

Thanks,  
Oleksandr

Hi Oleksandr,

Any required on file format (PNG vs JPG)?

Hi Viri,

We are able to download archives with images from the project in Zeplin (<https://zpl.io/2GRLydj>), but they contain image sets with different sizes for different iPhone models. Note that currently the app uses one set of background images with the following sizes for

corresponding scale for iPhone and iPad (portrait/landscape):

- 1x: 669x669
- 2x: 1338x1338
- 3x: 2007x2007

You can also find them in the attached archive.

Could you please send us the right image set with three scales that we can use in the project or just confirm that the currently used one (see attached) is fine?

Thanks,  
Oleksandr

Hello guys, as you already heard, we provided this zeplin project with specs for iOS and Android to be used as a guideline in the Informed Privacy Project.

IX Specs are in Alyssa's documentation.

~~My question here is - I provided a good~~

My question here is, I provided a good image in these screens, but please confirm if you can pull the background pic from the project or should I send it via email.
